

# Soay Solar Farm and Greener Grid Park Community update

## Hello from Statkraft

Construction of the Soay Solar Farm and Greener Grid Park is still in early stages. When completed, the project will generate renewable electricity equivalent to the needs of 18,500 homes\*, and reduce the UK's reliance on fossil fuels.

\*Consumption of 3578 kWh pa (BEIS, Dec 2020)

## Construction Latest

We continue to work on site mobilisation and grid connection works on a small portion of the site. Temporary traffic lights were recently installed at the site entrance. We had planned for these to be in place for approximately one month but we are pleased to report that work has progressed well, resulting in a reduced period of two weeks, ending on 28th February. We're also taking steps to keep local roads clean and safe, including speed checks on all our vehicles, a temporary 30mph zone on Melbourne Road, and regular road cleaning.

We will keep you updated as construction progresses, and more regular news will be published on our project website. Our website also includes a map of our construction route which shows the roads vehicles are using to access the site.

# Supporting The People's Pantry Pocklington at Christmas

There are a lot of different partners helping us to deliver Soay Solar and Greener Grid Park and we want to make sure the local area benefits from all of our activities. For Christmas, our construction partner Siemens Energy were delighted to donate alongside Statkraft to Pocklington's People's Pantry to support local people in the area through the festive period.

***Thank you so much to the Siemens Energy and Statkraft teams for their donation this Christmas. It made a real difference in supporting local vulnerable people and we really appreciate their generosity at what can be a difficult time for local families.***

Heather, The People's Pantry Pocklington

## Local suppliers

A variety of goods and services are required through the construction period, and many local companies would be suited to get involved. Register your interest or recommend a supplier at [www.statkraft.co.uk/soay](http://www.statkraft.co.uk/soay)
