

Extent of 50mm single frame image

Photomontage

Figure 6.19Y
Viewpoint 8
Strath Halladale, Calgarry

Distance to nearest turbine: 2782m Camera: Nikon D610 Focal Length: 50mm vertical (27°) x 28mm horizontal (65.5°) Camera height: 1.5m Date: 18/04/2019 11:16

The images contained on this page and the following page are not representative of scale and distance from the actual viewpoint and show the wind farm development in its wider landscape context only.

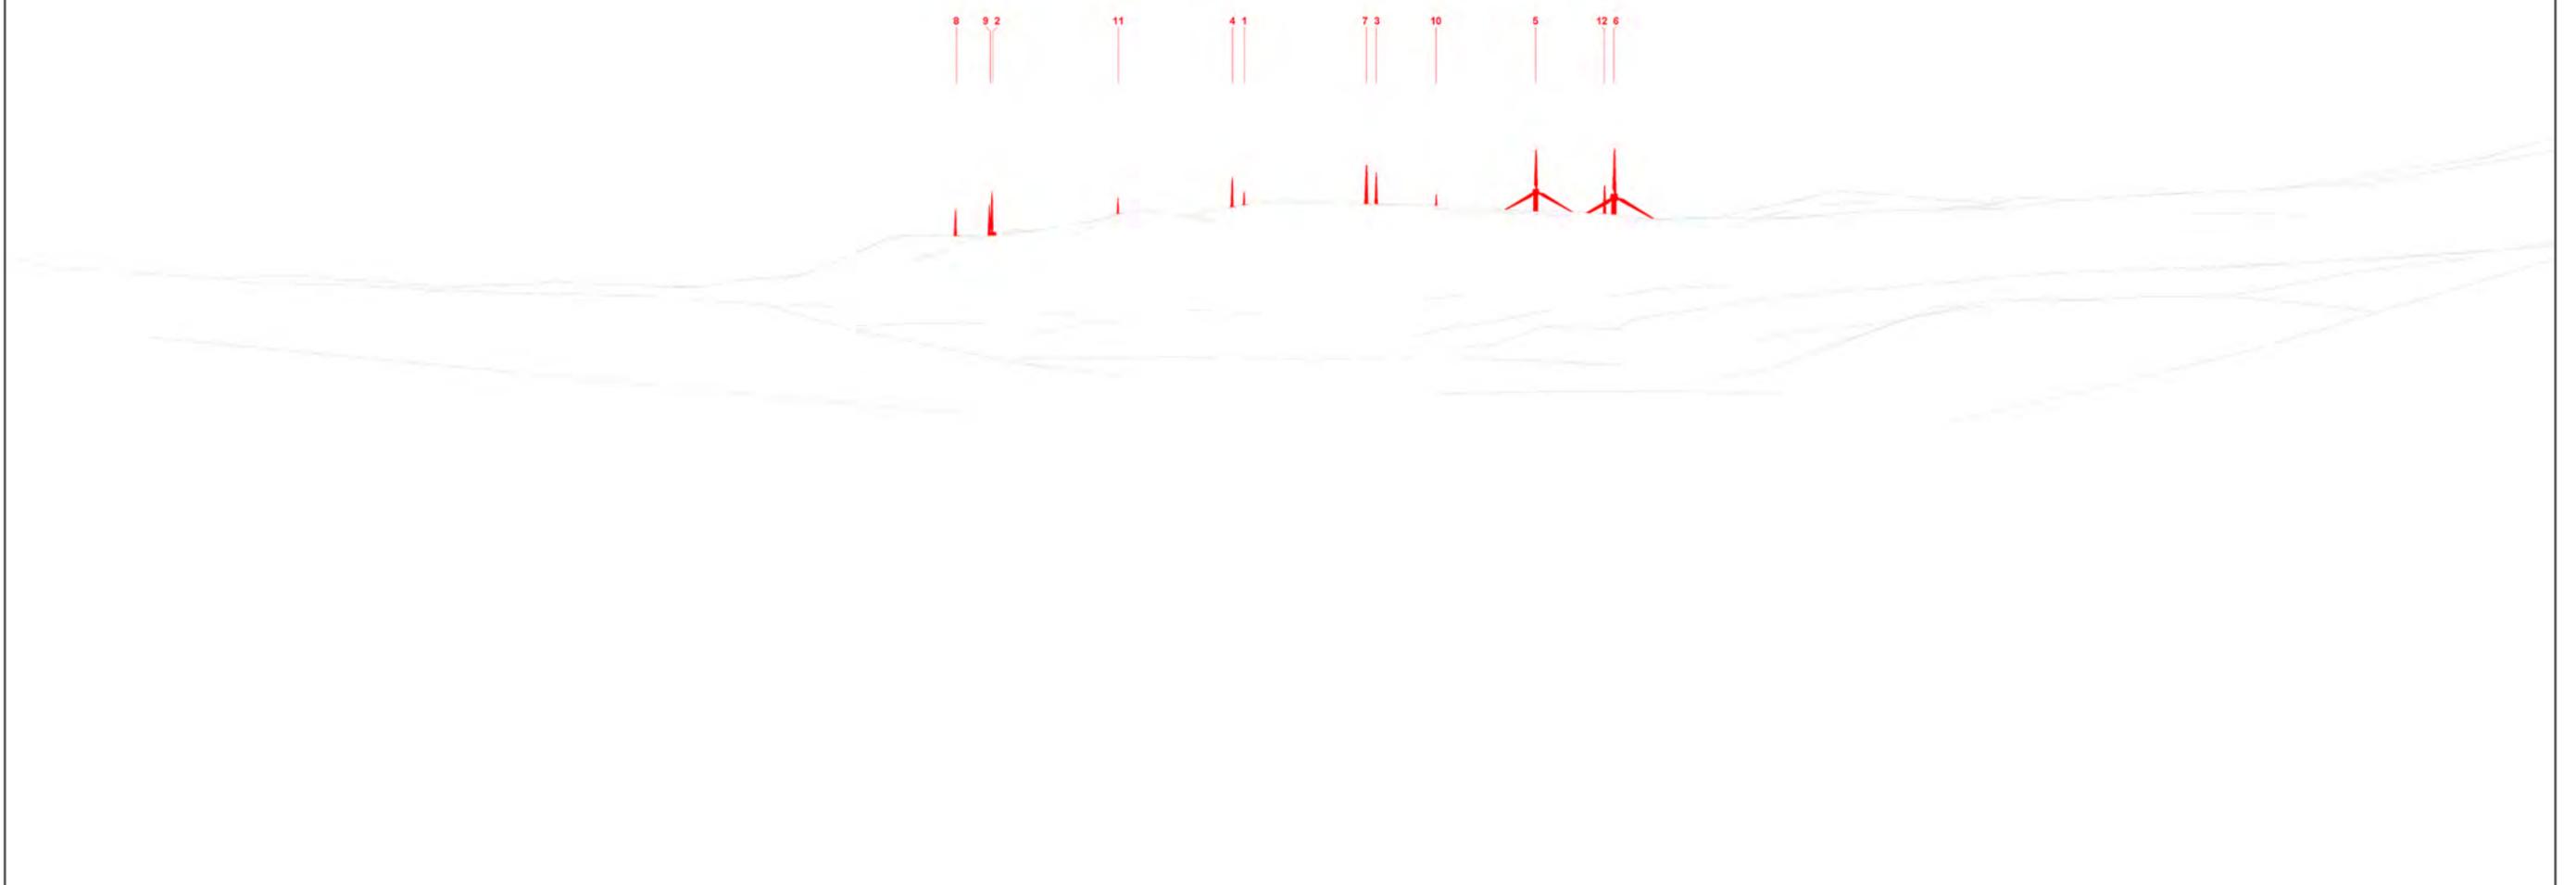

For empirical testing, the wireline image on the next page can be accurately assessed in the field when converted to a transparency. If viewed with one eye at a distance of 300mm from exactly the same location and height as the original camera lens, the image will fit the real landscape cues.
