

## Please note: this is a different proposal to Clash Gour

(that project is for 47 wind turbines being proposed by Force 9 Energy & EDF). This proposal is for an extension to the existing wind farm and not connected in any way to Clash Gour.

## Extending Berry Burn Wind Farm

We would like to tell you more about ourselves and our proposal to extend the existing Berry Burn Wind Farm by 10 turbines.

## A development partnership

Statkraft is the largest generator of renewable energy in Europe. In 2014 they built the Berry Burn Wind Farm which they still own and operate, and which has delivered almost £860,000 to local groups via the Berry Burn Community Benefit Fund.

The Airvolution team have been developing onshore wind farm projects throughout the UK since 2010, and are bringing forward suitable wind farm projects throughout Scotland for Statkraft to build, own and operate.

## Project Summary:

**10** Up to 10 wind turbines proposed

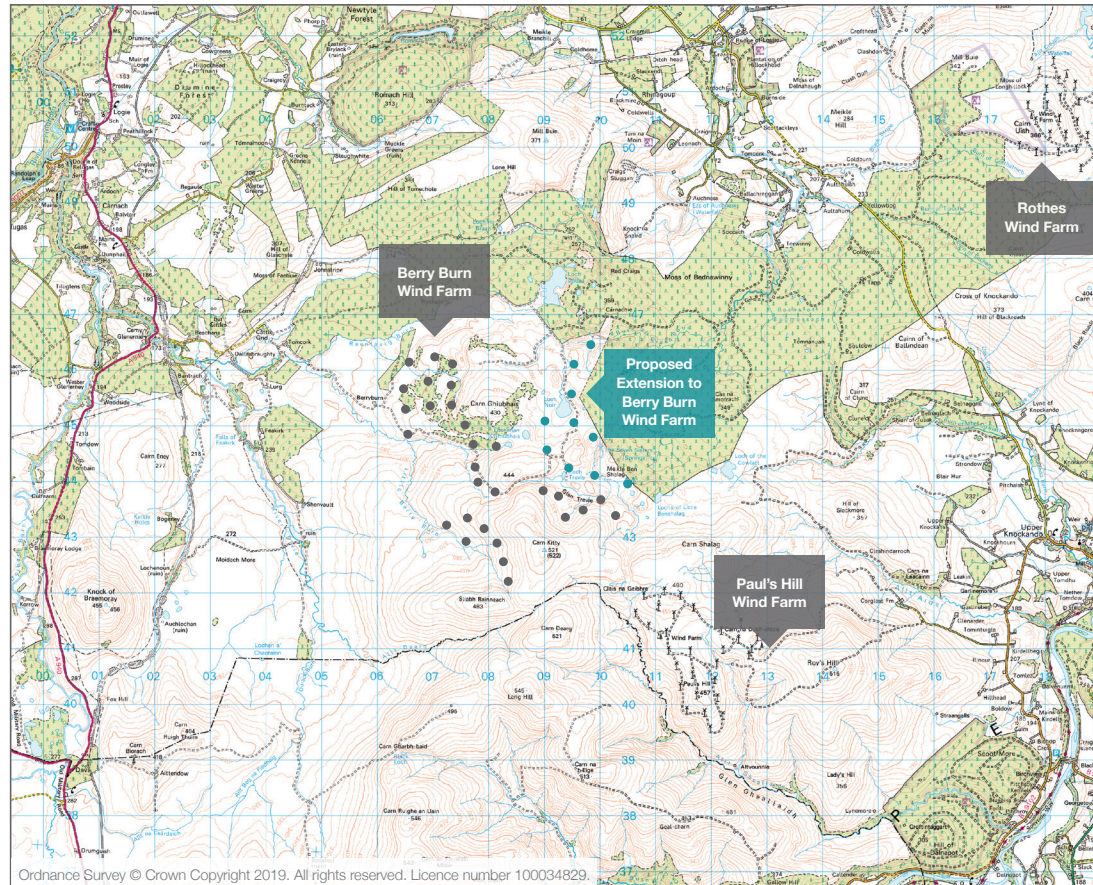

**£175k** Per year to the Community Fund - doubling the existing amount \*

Maximum height **150m**

“ ” Opportunity to talk about shared ownership and local suppliers

\* based on 10 x 3.5MW turbines, and £5,000 per MW installed.

## Community engagement is very important to us.

We would like to tell you more about ourselves and our project. We welcome the opportunity to discuss with you the potential to extend the existing Berry Burn Wind Farm.

## Exhibition venues:

 Edinkillie Community Hall, Forres IV36 2QW

 Thursday 21 March, 4pm to 8pm

 Rafford Village Hall, Forres IV36 2RU

 Friday 22 March, 10am to 2pm

 Knockando Margach Hall, Knockando, Aberlour, AB38 7RX

 Friday 22 March, 4pm to 8pm

 Upper Games Hall, Forres House, High Street, Forres IV36 1BU

 Saturday 23 March, 10am to 2pm

The extension to Berry Burn Wind Farm is being developed by the partnership between Airvolution and Statkraft who built, own and operate Berry Burn.
