

Supplier Trading Services - Electricity

24-7 Trading Desk

As a major player in the European trading market and Europe's largest generator of renewable electricity, Statkraft is ideally placed to provide you with Market Access and Trading Services. With a range of products from power trading to shaping and balancing services, Statkraft can provide you with a route to market and can remove risks and costs from your business. Should you so wish, we can also provide ROCs, REGOs or GoOs.

GTMA

The most simple product - a bilateral trading arrangement that you can call on to hedge customer volumes. Although not providing the certainty of other products, does reduce risk and allow you to trade in the Wholesale Market

TSA

By transferring your customer consumption to Statkraft's account, you remove the risk of balancing and shaping your portfolio. With increased market volatility predicted

this product significantly reduces your risk. Given the cost of setting up a 24-7 trading desk to adequately manage this risk, we also reduce your costs

Credit

Lines of credit for new entrants can be an issue. Speak to us about our innovative solutions

Green Certificates

We can help your business by providing ROCs, REGOs and / or GoOs.

AT A GLANCE

- Europe's largest generator of renewable electricity - 65TWh per annum
- An A-grade credit rating - annual sales of £5bn
- The largest provider of Power Purchase Agreements in the UK
- Extensive experience on providing Market Access in the UK and across Europe
